

Safety Policy

Misto Oilfield Services assumes a strong stand on safety of all our employees, our client's employees, general public, the environment and all related equipment. It is our policy that all our employees conduct themselves in a manner that promotes safety and the prevention of accidents at all times.

To achieve this goal, every reasonable effort shall be made to utilize the principles of accident and loss prevention in the management of all activities and programs.

Specifically, it is a management's and supervisory personnel to identify, control, and/or eliminate known hazards which can result in personal injury or illness, property damage, fire, negative environmental impacts of any form of controllable loss.

All personnel are ultimately responsible for their own safety by complying with legislative, company and industry standards as well as by promptly reporting all unsafe acts or conditions to supervisors. Supervisors are responsible for taking immediate action to solve such problems. Should an unsafe condition arise, MISTO will suspend all operations until remedial action has corrected the situation.

The success of our safety and loss prevention program requires the dedication commitment, involvement and participation of all personnel working together to achieve this common goal
